Mark : 58%

PROJECTS

MUSIC GENRE CLASSIFICATION USING ML (2022)

Music genre classification is the process of categorizing music into distinct genres based on their musical characteristics, such as rhythm, harmony, instrumentation, and lyrical content. There are many different genres of music, such as rock, pop, jazz, classical, hip-hop, and electronic music.

WAR FIELD BASED SPYING ROBOT USING RF (2023)

This initiative aims to decrease the number of human casualties in terrorist attacks like the 26/11 incident by creating a spy robot based on LORA technology that includes a wireless camera.

INTERNSHIP

HIGH RADIUS (FEB - MAY 2022)

I have the opportunity to gain hands-on experience in various aspects of business operations and contribute to the growth and success of the organization. I got the chance to meet the industrial experts. And they trained me with mock calls with clients
